

# MAY 1<sup>ST</sup>, 2 0 1 1 ART STRIKE!

Join the **MI Art Strike Coalition** as we begin organizing an action to transform our lives. For years now the Arts have been under attack, not just financially but culturally. At the same time that Arts funding is cut and politicized, our culture understands the value of Art and Artworkers less and less. We need more than a restoring of funding... we need a new vision for our society. We need a radical vision for employment, housing and education, because these things don't just affect artists - they affect all people. Artists can look at their own struggle in the face of austerity, inequity and uncertainty and imagine a better possible future, not just for themselves but everyone. Let us begin this work, first by coming together and asking *what is to be done?*
